Urinalysis Tubes

The American Scientific Products Urinalysis Tube is intended for use in the protection of fresh urine specimens from the time of voiding, through holding and transport to the clinical laboratory in the temperature range from 4 - 25 degrees C. for a time period not to exceed 72 hours. The ASP Urinalysis Tube preservation system allows room temperature exposure of the urine specimen (Volume: 2-0ml) for up to 3 days without alteration of reagent strip chemistries or microscopic examination and/or enumeration of formed elements. Made with copolymer containing built-in antimicrobial preservative. Tube comes with cap (separate).
